

# Database Developer, London

*We have an exciting opportunity for a Database Developer to join our global family of talent here at Foresight Factory.*

*Our ideal candidate will have a few years of experience already and be looking to develop their skills within an applied and analytical environment.*

*For over 20 years, our consumer trends and data insights have helped businesses ‘See Beyond’, using a unique combination of human and machine intelligence.*

Working with our CTO, and alongside our Data and Product Development teams, the role will be responsible for:

- Leading the BAU processing and maintenance of our data platform housing our proprietary survey data. The data platform is based around SQL server and SQL Server Analysis Service (SSAS).
- Developing a detailed understanding of our metadata processes, including where these can be made more efficient using Python.
- Identifying opportunities for efficiency improvements and automations within our data processing, and proactively sharing these with the Product team.
- Implementing new features as required by the roadmap, in addition to identifying new development opportunities
- Supporting our CTO in other areas of the development pipeline: namely our current web-scraping and machine learning projects

*Some of the key requirements for the role:*

- Degree educated - Computer Sciences, Software Engineering, Information Technology
- Minimum 4 years’ experience with SQL development (MS SQL Server) and familiarity with Analysis Services (SASS) and SQL Server Integration Services (SSIS). Experience of Python.
- Strong analytical thinking and problem-solving abilities.
- Being self-motivated and pro-active  
Excellent collaborator, with the ability to explain technical problems and solutions to non-technical colleagues
- Strong communicator, both written and spoken, with a fluency in English.

*What you will get in return:*

- Competitive salary according to skills and experience

- 
- Performance related bonus scheme
  - 28 days holiday plus public holidays.
  - Hybrid-flexible working
  - Access to a relaxed and friendly working environment
  - Social get-togethers and ad-hoc perks
  - Workplace pension
  - Cycle-to-work and tech schemes
  - Employee assistance programme support

Our people underpin everything that we do, and we believe that the strongest performing teams are inclusive of people who come from different backgrounds and have had different experiences. We are seeking a broad and diverse range of applicants for this role to create a welcoming company for all.

*If we sound like the kind of company you would like to be part of, please send your CV and a covering letter (including any salary expectations) to [careers@foresightfactory.co](mailto:careers@foresightfactory.co)*

Please note, only applicants progressing to the next stage will be contacted.
